SKILLS

SQL, Python, BigQuery, Tableau, Looker, Looker Studio, Sigma, Git, Excel, A/B Testing, Data Visualization, Stakeholder Communication, AI-Assisted Analytics

PROFESSIONAL EXPERIENCE

DraftKings

Manager, Cross Product Analytics | July 2025 - April 2026

- Managed and mentored two analysts through coaching, annual performance reviews, and structured improvement planning.
- Developed team roadmaps across referral, cross-play, and cross-sell initiatives to align analytics with product and business priorities.
- Owned cross-sell analytics and weekly executive reporting, translating performance drivers and risks into recommendations.
- Built a Refer a Friend analytics framework and funnel monitoring system to identify conversion drivers, surface attribution gaps, and inform strategy.
- Built a cross-sell attribution dashboard identifying last-touch interactions driving product adoption and informing optimization.
- Led cross-play personalization testing, generating approximately $40K in annualized theoretical gross gaming revenue by tailoring content to user behavior.
- Improved experimentation procedures by adding bonus redemption validation checks to reduce the risk of misconfigured test/control exposure.
- Refined Sigma automated alerting logic to improve internal analytics workflows.

Alchemy Worx

Manager of Analytics Team | July 2022 - July 2025

- Managed three junior analysts, overseeing projects, balancing workloads, and aligning stakeholder expectations.
- Continued hands-on client analytics alongside team management, delivering performance reporting, customer lifecycle analyses, and actionable recommendations across email and SMS.
- Led department-wide analyst meetings and cross-team collaboration sessions to share knowledge and resolve project roadblocks.
- Identified and addressed issues in automated messaging, contributing to revenue increases of up to 512% on those messages.

Alchemy Worx

Jr. Data Analyst | November 2019 - June 2022

- Owned email/SMS analytics across 30+ client accounts, delivering performance insights, lifecycle analyses, business reviews, and trigger audits.
- Created the framework for migrating client reporting from Excel to Looker Studio and built dashboards in Looker.
- Created and taught six-month courses in SQL and Looker Studio; recordings became reusable analyst training materials.

PROJECTS

MLB Game Outcome Prediction and Automation

Independent Project | Fall 2023 - October 2026

- Built a Python and BigQuery pipeline connecting MLB matchups, published lineups, rolling player statistics, and game-level win probabilities.
- Implemented a 31-feature logistic regression model using 7,594 historical games, with saved preprocessing, lineup weighting, and checks for missing or stale inputs.
- Developed scheduled prediction checks and email delivery with per-recipient tracking to suppress repeat sends, plus logging and automated tests.

EDUCATION

Binghamton University | MBA, Business Analytics & Supply Chain Management | 2019

Binghamton University | B.A., Mathematical Sciences; Minor in Economics | 2018
