## SKILLS

SQL, Python, BigQuery, Tableau, Looker, Looker Studio, Sigma, Git, Excel, A/B Testing, Data Visualization, Stakeholder Communication, AI-Assisted Analytics

## PROFESSIONAL EXPERIENCE

### DraftKings

Manager, Cross Product Analytics | July 2025 - April 2026

- Managed and mentored two analysts through coaching, annual performance reviews, and structured improvement planning; developed roadmaps across referral, cross-play, and cross-sell initiatives.
- Owned cross-sell analytics and weekly executive reporting, translating performance drivers and risks into actionable recommendations for stakeholders.
- Built a Refer a Friend analytics framework and funnel monitoring system to identify conversion drivers, surface attribution gaps, and inform strategy.
- Designed a cross-sell merchandising attribution dashboard to identify last-touch interactions driving product adoption and inform optimization recommendations.
- Led cross-play personalization testing, generating approximately $40K in annualized theoretical gross gaming revenue by tailoring content to user behavior.
- Strengthened experiment validation with bonus redemption checks to reduce misconfigured test/control exposure; refined Sigma alerting logic.

### Alchemy Worx

Manager of Analytics Team | July 2022 - July 2025

- Managed three junior analysts, overseeing projects, balancing workloads, and aligning stakeholder expectations.
- Continued hands-on client analytics alongside team management, delivering performance reporting, customer lifecycle analyses, and actionable recommendations across email and SMS.
- Led department-wide analyst meetings and cross-team collaboration sessions to share knowledge and resolve project roadblocks.
- Identified and addressed issues in automated messaging, contributing to revenue increases of up to 512% on those messages.

### Alchemy Worx

Jr. Data Analyst | November 2019 - June 2022

- Owned analytics across 30+ client accounts, delivering email/SMS performance insights, customer lifecycle analyses, annual business reviews, and trigger audits.
- Created the framework for migrating client reporting from Excel to Looker Studio and built dashboards in Looker.
- Created and led six-month weekly courses in SQL and Looker Studio, with recordings reused as analyst training materials.

## PROJECTS

### MLB Game Outcome Prediction and Automation

Independent Project | Fall 2023 - October 2026

- Built a Python and BigQuery pipeline connecting MLB matchups, published lineups, rolling player statistics, and game-level win probabilities.
- Implemented a 31-feature logistic regression model using 7,594 historical games, with saved preprocessing, lineup weighting, and checks for missing or stale inputs.
- Developed scheduled prediction checks and email delivery with per-recipient tracking to suppress repeat sends, plus logging and automated tests.

## EDUCATION

**Binghamton University** | MBA, Business Analytics & Supply Chain Management | 2019
**Binghamton University** | B.A., Mathematical Sciences; Minor in Economics | 2018
